1. SUBMISSION

Thank you for your interest in R&D Management. Note that submission implies that the content has not been published or submitted for publication elsewhere except as a brief abstract in the proceedings of a scientific meeting or symposium.

Once you have prepared your submission in accordance with the Guidelines, manuscripts should be submitted online at <http://mc.manuscriptcentral.com/rndm>.

Note, Book Reviews should be emailed directly to the Book Review Editor at:

Dr Khaleel Malik

R&D Management – Book Review Editor

University of Manchester

Oxford Road

The submission system will prompt you to use an ORCID iD (a unique author identifier) to help distinguish your work from that of other researchers. Click [here](#) to find out more. [Click here](#) for more details on how to use [ScholarOne](#).

For help with submissions, please contact the Editorial Office at RADMedoffice@wiley.com.

We look forward to your submission.

2. AIMS AND SCOPE

R&D Management publishes articles which address the interests of both practicing managers and academic researchers in R&D and innovation management. Covering the full range of topics in research, development, design and innovation, and related strategic and human resource issues - from exploratory science to commercial exploitation - articles also examine social, economic and environmental implications. In addition, the journal publishes notes and comments, and reviews of new publications in the field.

Preference will be given to papers which advance the state of the art in research, development, design and innovation management. They should address current or anticipated problems and issues, and implications for managers, R&D teams and organizations. The application of new methods and concepts is especially relevant. Research papers and high quality practitioner perspective papers are published.

3. PREPARING YOUR SUBMISSION

Papers should not normally exceed **5,000 words**.

Parts of the Manuscript

The manuscript should be submitted in separate files: title page; main text file; figures.

Title page

A title page should accompany all submissions and should contain:

- (i) a short informative that contains the major key words. The title should not contain abbreviations (see Wiley's [best practice SEO tips](#));
- (ii) full contact information for the corresponding author (address, email and telephone);
- (iii) the full names of the authors;
- (iv) authors biographies for all authors, including the institutional affiliations at which the work was carried out;
- (v) acknowledgements.

Authorship

Please refer to the journal's authorship policy in the Editorial Policies and Ethical Considerations section for details on eligibility for author listing.

Acknowledgments

Contributions from anyone who does not meet the criteria for authorship should be listed, with permission from the contributor, in an Acknowledgments section. Financial and material support should also be mentioned. Thanks to anonymous reviewers are not appropriate.

Conflict of Interest Statement

You will be asked to provide a conflict of interest statement during the submission process. See the

Main text

As papers are **double-blind peer reviewed** the main text file should not include any information that might identify the authors.

The main text file should be presented in the following order: (i) title, abstract and key words, (ii) main text, (iii) references, (iv) tables and figures, (v) appendices (if relevant).

Abstract

Please provide an abstract of no more than **350 words**, which clearly reveals the purpose, value and impact of the paper. The abstract should be optimized for search engines. It should state briefly why the work reported was done, how it was carried out, the most important conclusions and their implications for R&D management.

Main text

- As papers are **double-blind peer reviewed** the main text file should not include any information that might identify the authors.
- Endnotes to the text are not allowed and any such material should be incorporated into the text as parenthetical matter.

References

References follow the **Harvard** style, i.e. the author, date system.

- All citations mentioned in the text, tables or figures must be listed in the reference list.
- In the text give the author's name followed by the year in parentheses: Smith (2000).
- If several papers by the same authors and from the same year are cited, a, b, c etc. should be inserted after the year of publication.
- In the reference list, references should be listed in alphabetical order.
- Reference to unpublished data and personal communications should not appear in the list but should be cited in the text only (e.g. Smith A, 2000, unpublished data).
- Authors are responsible for the accuracy of the references.

Submissions are not required to reflect the precise reference formatting of the journal (use of italics, bold etc.), however it is important that all key elements of each reference are included. Please see below for examples of reference content requirements.

Journal Article

Benjamin van Rooij B, Stern RE and Fürst K. The authoritarian logic of regulatory pluralism: Understanding China's new environmental actors. *Regulation & Governance* 10: 3-13. <https://doi.org/10.1111/rego.12074>

Online Article Not Yet Published in an Issue

An online article that has not yet been published in an issue (therefore has no volume, issue or page numbers) can be cited by its Digital Object Identifier (DOI). The DOI will remain valid and allow an article to be tracked even after its allocation to an issue.

Murphy K, Tyler TR, Curtis A (2009) Nurturing regulatory compliance: Is procedural justice effective when people question the legitimacy of the law? *Regulation & Governance* <https://doi.org/10.1111/j.1748-5991.2009.01043.x>

Book

in the Uruguay round. In: Goldin I, Knudsen O (eds) *Agricultural Trade Liberalization: Implications for Developing Countries*, pp. 387-424. Organization for Economic Co-operation and Development, Paris.

Electronic material

Cancer-Pain.org [homepage on the internet]. New York: Association of Cancer Online Resources, Inc.; c2000–01 [Cited 2015 May 11]. Available from: <http://www.cancer-pain.org/>.

Tables

Tables should be self-contained and complement, but not duplicate, information contained in the text. They should be supplied as **editable files**, not pasted as images.

Figures

Legends should be concise but comprehensive – the figure and its legend must be understandable without reference to the text.

Although we encourage authors to send us the highest-quality figures possible, for peer-review purposes we are happy to accept a wide variety of formats, sizes, and resolutions.

[Click here](#) for the basic figure requirements for figures submitted with manuscripts for initial peer review, as well as the more detailed post-acceptance figure requirements.

Colour figures. Figures submitted in colour may be reproduced in colour online free of charge. Please note, however, that it is preferable that line figures (e.g. graphs and charts) are supplied in black and white so that they are legible if printed by a reader in black and white. Please note that R&D Management does not offer colour printing in hard copies of the journal, therefore any colour images will be printed in black and white.

Appendices

Appendices will be published after the references. Mathematical analysis and statistical data should be placed in appendices wherever possible.

Supporting Information

Supporting information is information that is not essential to the article but that provides greater depth and background. It is hosted online, and appears without editing or typesetting. It may include tables, figures, videos, datasets, etc. [Click here](#) for Wiley's FAQs on supporting information.

Note, if data, scripts or other artefacts used to generate the analyses presented in the paper are available via a publicly available data repository, authors should include a reference to the location of the material within their paper.

General Style Points

The following provide general advice on formatting and style.

- **Analysis and data:** Mathematical analysis and statistical data should be placed in appendices wherever possible.
- **Headings:** The priorities of headings and subheadings should be clearly indicated.
- **Numbers:** If the numbers are not to be reproduced in print they should be enclosed in square brackets.
- **Trade Names:** Trade names and specialist terminology should be avoided.
- **Paragraphs:** Paragraphs may be numbered, using decimal points to indicate the hierarchy.

Optimization.

Editing, Translation and Formatting Support: [Wiley Editing Services](#) can greatly improve the chances of your manuscript being accepted. Offering expert help in English language editing, translation, manuscript formatting and figure preparation, Wiley Editing Services ensures that your manuscript is ready for submission.

4. EDITORIAL POLICIES AND ETHICAL CONSIDERATIONS

Editorial Review and Acceptance

The acceptance criteria for all papers are the quality and originality of the research and its significance to our readership. Except where otherwise stated, manuscripts are **double-blind peer reviewed**. Papers will only be sent to review if the Editor-in-Chief determines that the paper meets the appropriate quality and relevance requirements.

Wiley's policy on confidentiality of the review process is [available here](#).

Data storage and documentation

R&D Management encourages data sharing wherever possible, unless this is prevented by ethical, privacy or confidentiality matters. Authors publishing in the journal are therefore encouraged to make their data, scripts and other artefacts used to generate the analyses presented in the paper available via a publicly available data repository, however this is not mandatory. If the study includes original data, at least one author must confirm that he or she had full access to all the data in the study, and takes responsibility for the integrity of the data and the accuracy of the data analysis.

Conflict of Interest

The journal requires that all authors disclose any potential sources of conflict of interest. Any interest or relationship, financial or otherwise that might be perceived as influencing an author's objectivity is considered a potential source of conflict of interest. These must be disclosed when directly relevant or directly related to the work that the authors describe in their manuscript. Potential sources of conflict of interest include, but are not limited to, patent or stock ownership, membership of a company board of directors, membership of an advisory board or committee for a company, and consultancy for or receipt of speaker's fees from a company. The existence of a conflict of interest does not preclude publication. If the authors have no conflict of interest to declare, they must also state this at submission. It is the responsibility of the corresponding author to review this policy with all authors and collectively to disclose with the submission ALL pertinent commercial and other relationships.

Funding

Authors should list all funding sources in the Acknowledgments section. Authors are responsible for the accuracy of their funder designation. If in doubt, please check the Open Funder Registry for the correct nomenclature: <http://www.crossref.org/fundingdata/registry.html>

Authorship

The list of authors should accurately illustrate who contributed to the work and how. All those listed as authors should qualify for authorship according to the following criteria:

1. Have made substantial contributions to conception and design, or acquisition of data, or analysis and interpretation of data;
2. Been involved in drafting the manuscript or revising it critically for important intellectual content;
3. Given final approval of the version to be published. Each author should have participated sufficiently

Contributions from anyone who does not meet the criteria for authorship should be listed, with permission from the contributor, in an Acknowledgments section (for example, to recognize contributions from people who provided technical help, collation of data, writing assistance, acquisition of funding, or a department chairperson who provided general support). Prior to submitting the article all authors should agree on the order in which their names will be listed in the manuscript.

ORCID

As part of our commitment to supporting authors at every step of the publishing process, R&D Management encourages the submitting author (only) to provide an ORCID iD when submitting a manuscript. This takes around 2 minutes to complete. [Find more information.](#)

Publication Ethics

This journal is a member of the [Committee on Publication Ethics \(COPE\)](#). Note this journal uses iThenticate's CrossCheck software to detect instances of overlapping and similar text in submitted manuscripts. Read our Top 10 Publishing Ethics Tips for Authors [here](#). Wiley's Publication Ethics Guidelines can be found at <https://authorservices.wiley.com/ethics-guidelines/index.html>

5. AUTHOR LICENSING

If your paper is accepted, the author identified as the formal corresponding author will receive an email prompting them to log in to Author Services, where via the Wiley Author Licensing Service (WALS) they will be required to complete a copyright license agreement on behalf of all authors of the paper.

Authors may choose to publish under the terms of the journal's standard copyright agreement, or [OnlineOpen](#) under the terms of a Creative Commons License.

General information regarding licensing and copyright is available [here](#). To review the Creative Commons License options offered under OnlineOpen, please [click here](#). (Note that certain funders mandate that a particular type of CC license has to be used; to check this please [click here](#).)

Self-Archiving definitions and policies. Note that the journal's standard copyright agreement allows for self-archiving of different versions of the article under specific conditions. Please [click here](#) for more detailed information about self-archiving definitions and policies.

Open Access fees: If you choose to publish using OnlineOpen you will be charged a fee. A list of Article Publication Charges for Wiley journals is available [here](#).

Funder Open Access: Please [click here](#) for more information on Wiley's compliance with specific Funder Open Access Policies.

6. PUBLICATION PROCESS AFTER ACCEPTANCE

Accepted article received in production

When your accepted article is received by Wiley's production team, you (corresponding author) will receive an email asking you to login or register with [Author Services](#). You will be asked to sign a publication license at this point.

Proofs

Once your paper is typeset you will receive an email notification of the URL from where to download a PDF typeset page proof, associated forms and full instructions on how to correct and return the file.

Please note that you are responsible for all statements made in your work, including changes made during the editorial process and thus you must check your proofs carefully.

white.

Early View

The journal offers rapid publication via Wiley's Early View service. [Early View](#) (Online Version of Record) articles are published on Wiley Online Library before inclusion in an issue. Note there may be a delay after corrections are received before your article appears online, as Editors also need to review proofs. Once your article is published on Early View no further changes to your article are possible. Your Early View article is fully citable and carries an online publication date and DOI for citations.

7. POST PUBLICATION

Access and sharing

When your article is published online:

- You receive an email alert (if requested).
- You can share a link to your published article through social media.
- As the author, you will have free access to your paper (after accepting the Terms & Conditions of use, you can view your article).

You can now order print copies of your article (instructions are sent at proofing stage or use the below contact details).

Email: offprint@cosprinters.com

Now is the time to start promoting your article. Find out how to do that [here](#).

Measuring the Impact of your Work

Wiley also helps you measure the impact of your research through our specialist partnerships with [Kudos](#) and [Altmetric](#).
